

ARIN KARABULUT

Full-Stack Web Developer

Coral Springs, FL (open to remote) | akinsuranceagent@gmail.com | arinkarabulut.com | github.com/Arink1

SUMMARY

Full-stack web developer who ships production applications and keeps them running. Built and operate a multi-tenant sales SaaS (Next.js, Prisma, Twilio, Stripe), a three-site game network with a Stripe-to-RCON store, and lead-generation sites for legal and insurance clients on Next.js, Supabase, and Python serverless functions. Own the whole lifecycle: architecture, UI, backend, Vercel and AWS deployment, DNS, analytics, and maintenance. Licensed insurance broker with experience handling regulated data (HIPAA, CMS, TCPA).

TECHNICAL SKILLS

Frontend: React 19, Next.js 15/16 (App Router), TypeScript, Tailwind CSS 4, Vite, HTML/CSS, responsive and conversion-focused UI

Backend: Node.js, Python, Django REST Framework, PostgreSQL, Prisma, Supabase (Postgres, RLS, Auth), REST APIs, serverless functions, webhooks and cron jobs

Integrations: Stripe (Checkout, subscriptions, metered billing, webhooks), Twilio Voice SDK and SMS, Resend, Mapbox and Deck.gl, Chrome extensions

AI: Claude API, OpenAI API, local LLMs with Ollama, prompt design, scheduled content generation

DevOps: Vercel, Docker, AWS Elastic Beanstalk and RDS, Git and GitHub, CI/CD, DNS and domains

CMS and commerce: WordPress, PHP, MySQL, Shopify and Liquid

SELECTED PROJECTS

OnlyDialer, multi-tenant sales SaaS

Next.js, TypeScript, Prisma, PostgreSQL, Twilio, Stripe

Power dialer, CRM, and SMS campaigns behind one login. Live at onlydialer.com, crm.onlydialer.com, sms.onlydialer.com

- Designed the multi-tenant architecture: org-scoped data, per-organization Twilio sub-accounts and numbers, plan-based feature gating, and white-label support.
- Built the dialer on the Twilio Voice SDK with local presence, call recording and playback, and 2FA agent login; SMS drips with opt-out handling and delivery reporting.
- Implemented Stripe per-seat subscriptions plus metered usage billing, and a Chrome extension that imports leads from the inbox into the CRM.

HG Network, three game-server sites from one codebase

Next.js 16, React 19, Tailwind 4, Stripe, Supabase, RCON

hgcrafting.vercel.app, hgrusty.vercel.app, hgdarkrp.com. One repo, three Vercel projects switched by an environment variable

- Store pipeline: Stripe Checkout, webhook to Supabase, command queue, and a poller on the game host that delivers purchases over RCON and acknowledges them.
- Shared components with per-site theming, markdown news and rules, live player counts from mcstatus.io and BattleMetrics, and generated sitemaps and Open Graph images per site.

LegalHelp911, legal lead-generation site

Next.js 15, Tailwind 4, Python serverless, Supabase, Claude API

legalhelp911.vercel.app

- Mixed-runtime Vercel deploy: Next.js pages plus a Python intake function that validates leads, drops honeypot traffic, and stores TCPA consent per lead.
- Supabase Postgres locked down with RLS and service-role-only access; weekly cron drafts SEO articles with the Claude API for review before publishing.

Arin Health Agent and Bryan Health Agent, insurance sites

Next.js, React 19, Supabase, Resend, Vercel

arinhealthagent.com, bryanhealthagent.com. Live with real organic traffic

- Conversion-focused landing pages with consultation forms, Resend notifications, TOTP-protected admin, and Claude-drafted news for SEO.
- First version shipped as a Django REST backend and Next.js frontend on AWS Elastic Beanstalk with RDS; rebuilt on Next.js and Vercel.

Other work

github.com/Arink1

- Brand Forge:** Next.js 16 brand-identity generator on a local Ollama model with PDF export. **Intelligence App:** React and Deck.gl geospatial dashboard rendering 100k+ points over Mapbox.
- Django REST API on AWS:** custom user auth with email verification, Dockerized, deployed to Elastic Beanstalk with RDS. **Also:** WordPress and Shopify client sites, and this portfolio (Next.js 16, Resend contact form).

EXPERIENCE

Full-Stack Web Developer, Independent

Aug 2024 to present

- Design, build, deploy, and maintain the products and client sites above; own hosting, DNS, analytics, billing integrations, and support.

Licensed Insurance Broker, First Family Insurance, Sunrise, FL

Oct 2024 to Jan 2026

- Advised individuals and families on health and life coverage while handling regulated data under HIPAA and CMS rules; built and shipped arinhealthagent.com during this role.

Operations Manager and Web Developer, MGI Farms, Michigan

Aug 2024 to Nov 2024

- Ran a seasonal hiring cycle end to end and built internal web tooling for hiring workflows and management-to-staff communication.

Customer Service Representative, Teleperformance (remote)

Mar 2023 to Jan 2024

Seafood and Meat Clerk (part time), Publix Super Markets

Dec 2025 to present
